(a) model8000_rpp_rad along an x-sweep
y = z = 50
training range x ∈ [0, 2π]
y = z = 100
y = z = 150
position error
target x
(b) training covers θ1 ∈ [−49°, 0°]
reachable θ1 (full workspace)
θ1 in train_rpp_rad
density
base angle θ1 (deg)
